Boy T. Stekelbos

Languages:
Dutch- Native
English- Native
German - Limited
Working Proficiency

Technical Skills:
Fully Proficient:

Office 365
Python
Bigquery
Looker Studio
Google Analytics 4
Google Tag Manager
Supermetrics

Currently teaching myself:

SciKit Learn
Tensorflow
Javascript
SQL

Hobbies:
Magic The Gathering
Building web scrapers
Basketball

Experience

WEB ANALYTICS INTERN, THE SOCIAL HUB – 2022 - PRESENT
During this internship I gained valuable skills such as:

-Stakeholder management

-Hands on experience in setting up website tracking code

-Data analysis and storytelling

-Getting comfortable with the Google stack (GA4, GTM, Looker Studio, Bigquery)

SECURITY GUARD, WORKRATE – 2018-2021
Worked as a security guard at a datacenter which made me interested in the world of data.

Education

UNIVERSITY OF AMSTERDAM, NETHERLANDS – BSC BUSINESS ADMINISTRATION 2017 - 2022
For my graduate thesis I analysed the Dutch real estate market, specifically funda.nl which consists of 60% of all real estate sales in The Netherlands. In which I utilised a natural language processing model, to scan the text description under each property in order to find out whether different types of content lead to differing selling prices and listing times.

UNIVERSITY OF AMSTERDAM, NETHERLANDS – MINOR, PROGRAMMING 2019 - 2020
During this minor I built several web applications, with my final project being an airbnb clone in which people who leave for a trip at the same time get matched up in their respective cities. In this project I used mainly Django for website storage and Python for the back-end.

Skills

- Independent worker

- Highly motivated

- Problem solving mindset

- Attention to detail

- Team player
